The institution boasts ICT classrooms, which have proven to be valuable teaching tools. Many teachers utilize Power Point Presentations in their lectures, as they have observed that it enhances the students' grasping power. These classrooms have proven effective in illustrating difficult topics and resolving doubts through online interactions.

Students also benefit from these ICT classrooms as they use them to deliver their own PowerPoint presentations during seminar sessions each semester. Additionally, teachers use ICT classrooms to showcase reference books and online study materials, making the learning process more engaging and interactive.

Furthermore, the institution has gone a step further by recording lecture series based on the course curriculum. These recorded lectures are made available on the institutional website, granting students easy access to study materials. Some teachers have even created their own YouTube channels to upload recorded lectures. This initiative has proven to be beneficial for a significant number of students, as it allows them to access learning resources conveniently and adequately prepare themselves for their semester-end examinations.

By leveraging technology and incorporating ICT into the educational process, the college aims to create a dynamic and enriched learning environment for its students, promoting self-directed learning and facilitating academic excellence.
