

## EMERGING TRENDS IN INDIAN POLITICS

Dyavappa L. Pawar Assistant Professor and Head, Department of Political Science, Shri Annadaneshwar Arts, Science and Commerce College,

Naregal, Gajendragad, Gadag, Karnataka

The dawn of 21st has witnessed some new features of Indian politics that seem not to be truly democratic. These features are neither of dictatorship nor of totalitarianism rather do they depict declining capacity of welfare state. The effects of globalization on Indian politics has created an imbalance between interests of social classes and corporative interests which compelled the political regimes to adopt certain measures that can be called post democracy. There has been a sea of changes in nature of party politics, agenda setting, policy priorities, and role of media and aspirations of people. The present paper intends to underline the features of Indian politics in context of party politics, growing corporate interventions and role of media in the changed scenario.

Keywords: Democratic Consolidation, Post Democracy, Party Politics, Corporate World, and Media

In last two-three decades, some new trends have appeared in Indian politics. These Introduction changes have gone against the features of true democracy. The major factor leading to these changes have been the growing significance of corporate world in governing process for two reasons - ensuring prospects of fast economic growth in the country and accruing financial support by the political actors. This has brought a striking paradigmatic shift in Indian politics that has come on surface in recent past. These changes and paradigmatic shifts in democratic functioning need to be underlined and analyzed in order to understand the changed complexions of Indian politics. The theoretical frame work of 'post - democracy' seems to be a relevant parameter to trace the emerging features of working of Indian democracy in last few decades particularly since dawn of 21st century. As such the present paper is a modest attempt to trace the 'post democracy' features in Indian politics.

Post Democracy: The Nomenclature of Emerging Trends Owing to growing interventions of market forces, there has been shift in governance process that ignore the interest of the people. Some western social & political scientists like Colin Crouch and Robert Rorty termed these inevitable changes and paradigmatic shifts in democracy as 'post democracy'. The emerging features of working of democracy in developing countries are queer in nature that neither can be called truly democratic nor undemocratic. The basic framework of democracy remains the same but the operation of democracy has encircled some new features. To make it more clear it implies that something new has come into existence to reduce the importance of democracy, however, democracy has still have left its mark and strong traces around, hence 'post democracy'. It calls attention to recognized democracies that are losing some of their foundations and evolving towards an aristocratic regime.

- In order to mark the 'running evolution', it becomes pertinent to have an idea on the
- Which have witnessed changes owing to globalization? A number of scholars have attempted to articulate the parameters of democracy in order to measure its level of
