

Institutional distinctiveness Describe/Explain the performance of the institution in one area distinctive to its vision, priority and thrust.

The importance of soft skills for students is enormous, both with regard to their studies and with regard to their future careers. Prioritizing these needs of the students, S A Degree college , Naregal. initiated an online guided program on Basic Soft Skill Development titled 'Scale Up Your Skills'. The motive was to upgrade students, to prepare them for a better future . The course was aiming to enhance the soft skills of students and was open to all.

The objective of the program was

1. Personal improvement through a guided program.
2. Acquainting participants with soft skill development strategies which will help in building their confidence.
3. To make use of the uncertain times productively Our priority is the holistic development of an individual through acquiring knowledge and basic soft skills and communication skills. A team of teachers was identified to structure the course content, manner of delivery, and the pattern of the course. Initially, the program started with online audio lectures on basic communication skills and presentation skills. Later after a month, a new section on technical skills was added to it where different basic technical skills were structured into the course. The program was planned in such a way that it would cover all the basics progressing towards the advance level.

The following instructors from S A Degree College involved in content creation

Technical Skills:

Communication Skills

Presentation Skills: The students were provided with module-wise videos and study material on a regular basis during the entire duration.. Keeping in mind the institute's vision 'Enlighten to Excel' we initiated this course which would definitely help students to achieve professional success in today's competitive world. The response received for this course from the students' end was very overwhelming, so we plan to add more courses and enhance existing modules.
