

MY IDEA OF A GOOD TEACHER

✉ **Dr. Ratna R. Patil**, Department of Commerce, Shree Annadhaneshwar Art's, Science & Commerce, College, Naregal
Tq. Gajendragad, Dist : Gadag.

A Good teacher is the one who plays significant role in the life of a student. A person is moulded by a Teacher and gains a massive respect and position in the society. A Person's career is partially depended on the Teacher. The person who has the ability to contribute for the development of the country is Teacher, because a country's development is based on human resource of a particular country. The excellence of a person can be only built by a Teacher.

There is no literal meaning to describe 'Teacher' because the most unmeasurable and precious thing in the world is knowledge which are gifted by the teachers to their student. Characterization of a person is carried throughout the stages of life in which a teacher contributes the most on the process of Characterization of a student. As students spend more time with their teachers in each different levels they learn and are influenced by their teachers.

A Good Teacher is the one who inspires everyone and stand as Role Model to their students. A Teacher can be influential or inspire able only when they are admired by students. Teaching is meant for people beyond ages. A person can learn or teach irrespective of their age.

A Teacher shall not only teach for the educational purposes of a person. Teaching is not only meant for teaching subjects related to study. It also means that a Teacher could teach Human values, discipline, good behaviour, and general knowledge beyond the subjects related to studies. A Person can be felicitated as a Teacher only if he/she is in the position to preach, teach to others without expecting individual or material benefits from anyone.

Teaching means a teacher sharing full knowledge with enthusiasm to students in such a manner that they obey and follow the words of Teacher. Teaching is a profession were a person selflessly works to the empowerment of their students.

A Teacher will also be transformed as a student each time when they hold their book to teach. While teaching

students a Teacher him/her self is automatically transformed into a learner student because, he /she wants to share knowledge full fledged to students, hence every good Teacher will once turn into a student before entering class and start teaching.

The methods of teaching of each teacher is different. It is important that the concepts explained is understood by students. The way of explaining the concepts in a easy way is prominent. The explanation of a Teacher should be eminent, their voice should be filled with confidence and enthusiasm which cheers the students to concentrate on the teaching of a teacher. A teacher should be friendly natured with the students so that they can ask, verify their doubts without fear or hesitation. Because many students will be having a type of fear to talk with their teachers so a teacher should make them feel comfortable while talking with their teachers about the studies or other problems of life in which they shall need the guidance of their teacher.

Good Teacher is the one who makes the students to understand the concepts, motivate them with means of life, fill courage in them to survive strongly in the society and to fight against the problems of life. A Good Teacher can change the life of many students by correcting them if they are in the wrong path and guide to those who are in right path and becomes light in life of many students. Hence there is a saying that 'A good Teacher is like a candle it consumes itself to light the way for others'.

Teaching is something which is not possible by all. The blessed, skilled shall grab the opportunity to share their knowledge with others and teach. Generally while teaching, a teacher should take preparation for presenting the concepts/lessons to students to acquire knowledge and virtue. A teacher shall always think to improve the teaching skills, techniques and tries to produce quality students. They preach moral characters and raises motherly love to teach their students. They remain patient in managing classroom, they manage the behaviours, cooperate whole working with colleagues, communicating with students. A good teacher is not only a teacher but should also be a good learner.

The qualities which a good teacher should possess are, A teacher should be knowledgeable in his/her subject of specialisation, they must be passionate, approachable, good communicator, and professional. They shall have skills in communication, listening, collaboration, adaptability, empathy and patience. Their effective teaching shall include an engaging classroom, value in real world the Teacher shall have the qualities like exchange of best practices. They shall be creative, and shall have interpersonal skills, Fair-mind, consistent, Rewarding, Reliable, Motivating, Nurturing, and also passionate, They should have punctuality, organisation skills, Ethics, Dignity and honesty.

Being a good teacher is not simple and easy. Each student are different and shall have different mind sets, behaviour, characteristics, and understanding capacity. Being patience and handling them with will be a great task for every good teacher. Making students to understand the teachings is the most important, the communication skills of teacher helps them to function this and convey to students.

Being a good teacher in the sense enhancing students, help them in career building process. Behind every successful man there will definitely be the struggle and contribution of their teachers. A teacher believes that their success lies when his/her student secure a major position in society and recognise the contribution of their teacher in their success. Every good teacher only expects that their students to grow into high position and remember their teachers in the journey of their life. The teacher is a person who stands by others inspiring many students to follow their path. A teacher is always well wisher to others and finds happiness in others achievements and help the students who are in the path of failure and leads them to strive to the path of success and achievement.
